## MEG007MX COMPUTERIZED FAULTS

### DESCRIPTION:

The MEG007MX trainer is constructed from a new or late model vehicle, and is cut at the lower terminus of the windshield pillars and through the rocker panels and the floor. The right and left drive axles are disengaged to prevent powered rotation of the wheels during use. This trainer will have a complete operational engine with “built in” fault simulation, drive train, ECM computer systems, transaxle/transmission, suspension, and front brakes, electrical and exhaust systems.

### INCLUDES:

- Removable Casters
- Fully Operational Trainer
- Computer Controlled Faults
- Console Breakout Box
- Fault box can be customized
