

ELECTRICAL/ELECTRONIC SYSTEMS

MEGFORDEE - BASIC ELECTRICAL MODULES

DESCRIPTION:

The Basic Electrical Series are mounted on clear plexiglass baseboards, complete with black silk screens that show the schematic symbol of the components and the tip jack number that relates to the activity. Each numbered jack uses a durable, stackable banana jumper to build the circuit. Each board uses real automotive parts to better transfer the knowledge to a vehicle. The edges are flame polished for easy handling in the classroom.

- Requires 12VDC.
