

ALTERNATIVE ENERGY SERIES

COURSE DESCRIPTION:

Megatech's patented technology in electric dynamometers has enabled the design of the hybrid vehicle to be utilized for dual purposes. The first objective is to deliver a vehicle of combined technologies, incorporating alternative energy use for transportation purposes. That is, the MEGASTAR 1 can run on solar energy, gaseous fuels such as propane/natural gas or gasohol. In either case, even if the vehicle is not in use, energy from the sun or from the engine can charge the batteries.

Equipment and Parts List:

- Vehicle
- DC motor and Controls
- Dashboard and Gauges
- Solar Panel Array
- 3.5 HP Engine with Generator
