

ALTERNATIVE ENERGY SERIES

Biodiesel Engine Program MEG310 & MEG320

Developed to supply students with the basic skills, theory and understanding, in alternative energy initiatives, Megatech's biodiesel program has become an increasingly popular. Biodiesel contains no petroleum, but it can be blended at any level with petroleum diesel to create a biodiesel blend. It can be used in compression-ignition (diesel) engines with little or no modifications. Biodiesel is simple to use, biodegradable, nontoxic, and essentially free of sulfur and aromatics. Our engine test stands with or without dynamometers can run and demonstrate the latest biodiesel technology.
