

# ALTERNATIVE ENERGY SERIES

## The Megatech Energy *Plus* STEM Kits

### Skill Transfer Energy Module Kits

#### OVERVIEW:

Megatech was the company that pioneered Alternative Energy Training Modules decades ago with distinct, patented energy conversion devices. These products were developed to supply students with the basic skills, theory and understanding. Megatech is releasing a new line of modules complete with integrated academics, and our unique STEM (Skill Transfer Energy Modules). The core training modules develop the theory and understanding and applied academics, while the STEM kits allow students to actually build and install basic systems.

- Solar Photovoltaic
- Solar Thermal
- Wind Generation
- Biodiesel

#### **Solar Thermal Evacuated Glass Tube Kit:**

- Sunmaxx 10 Evacuated Glass Tube collectors
- Helio Solar Station Single Pump
- Twenty Gallon tank with electric back up
- Stainless Steel, insulated tubing with Control wire
- Expansion Tank

#### **Solar Thermal Glazed Flat Plate Kit:**

- Sunmaxx M2 Flat plate collectors
- M2 flush mounting hardware kit
- Helio Solar Station Single pump
- Twenty Gallon Tank, with electric back up
- Stainless Steel, insulated tubing with control wire
- Gallon expansion tank
